DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "not proportional" in claim 18 is a relative term which renders the claim indefinite. The term "not proportional" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. In other words the sizes of the head, base and body have been rendered indefinite due to the use of the relative term "not proportional".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18-19, 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Del Castillo et al '548 in view of Fong '043 and Robbins '907. Del Castillo discloses

Application/Control Number: 09/851,539

Art Unit: 3712

some of the elements of the claims including a motor assembly having a motor as required by claim 19 (fig. 10c, element 740) which is used to control the movement of a doll's (60) head and it's related potions (fig. 1) as required by claim 18, wherein the doll has a base which resembles feet (figure 1 and cols. 4-5, lines 65+ and 1-3, respectively. Del Castillo further teaches a head position assembly (figs. 1 and 10a-10c) interposed between the head and the body (figure 1, element 69 and col. 2, lines 49-51) wherein the head rotates about the head position assembly while the head position assembly remains generally stationary in relation to the body (figure 10a) where the servo 650 remains in position while the head rotates around it through the movement of element 775, as required by claim 21. A position monitoring structure, as required by claim 22, is shown in fig. 10b as element 654. A biasing structure, as required by claim 23, is shown in fig. 10c as element 760 and described in col. 20-21, lines 61+ and 1-3, respectively.

The reference fails to teach a base configured to disguise a power source as required by claim 18, a body mounted on the base having a size that is not proportional to the base as required by claim 18, a head having a size that is not proportional to the body size as required by claim 18, the base being adapted to provide a counter-weight to support the head in an upright position, as required by claims 24 and 25. However, Fong discloses an animated doll, which teaches a base shaped to resemble feet (elements 36) configured to disguise a power source (figure 3). Robbins teaches that it is known to provide a doll having a body of a size that is not proportional to the base (figures 1 and 2) and a head of a size that is not proportional to the body size (figures 1 and 2) so that the doll may stand on the feet (col. 1, lines 68-69). Therefore, in view of

Application/Control Number: 09/851,539

Art Unit: 3712

doll easily recognizable.

Fong, it would have been obvious to one having ordinary skill in the art, at the time of the claimed invention, to disguise a power source in a base resembling feet for the purpose of hiding a power source in an easily reachable location. It would have been further obvious to provide the doll of Del Castillo with a body of a size that is not proportional to the base and a head of a size that is not proportional to the body size for the purpose of stability and added ability to show facial features in order to make the

Page 4

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Del Castillo et al '548, Fong '043 and Robbins '907 in view of May et al '289. Del Castillo, as modified by Fong and Robbins, discloses all the elements of the claims, as stated above, and further including a servo motor and clutch system for movement of eyes (col. 2, lines 49-51) however the reference fails to explicitly teach the movement of eyelids as required by claim 20. May discloses a mechanism for animating a doll's facial features, which teaches that it is known to provide an animated doll with moveable eyelids (col. 3, lines 52-53). Therefore it would have been obvious to provide the doll of Del Castillo, as modified by Fong and Robbins, with moveable eyelids especially since Del Castillo envisions his mechanical assembly utilized for movement of a variety of a doll's features including eyes.

Allowable Subject Matter

Claims 1-6 and 34 are allowed.

Art Unit: 3712

Response to Arguments

Applicant's arguments with respect to claims 18-25 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dmitry Suhol whose telephone number is 703-305-0085. The examiner can normally be reached on Mon - Friday 9am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 703-308-1745. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
